Personal Projects

Project 1 : Online Shopping Website

Technology Used : Html,CSS,Javascript,Java,Mysql

An online shopping web application is a digital platform that allows users to browse, search, and purchase products or services over the internet. These applications provide a convenient and user-friendly interface for buyers to explore a wide range of items, make informed decisions, and complete transactions without the need to visit physical stores.

Project 2 : Student Result System

Technology Used : Html,CSS,Javascript,Java,Mysql

A Student Result System website is a web application designed to manage and display academic results for students.

Project 3: Portfolio Website

Technology Used : Html,CSS,Javascript

A portfolio project is a concise and visually appealing online showcase that highlights an individual's or a company's skills, work samples, and achievements.

Minor Project

Project name : Algorithm Visualizer

Technology Used: Html,CSS,Javascript

An algorithm visualizer project is a web application that provides an interactive and graphical graphical representation of various algorithms, allowing users to observe how these algorithms work step by step.
